GOLDEN ARROW RESOURCES CORPORATION
(An Exploration Stage Company)
NOTES TO INTERIM CONSOLIDATED FINANCIAL STATEMENTS
FOR THE THREE MONTHS ENDED MARCH 31, 2008
(Unaudited – Expressed in Canadian Dollars)

1. NATURE OF OPERATIONS

Golden Arrow Resources Corporation (the “Company”) was created on July 7, 2004, as a result of a corporate restructuring plan (the “Reorganization”) completed by IMA Exploration Inc. (“IMA”). Shareholders of IMA were issued one share of the Company for every ten shares of IMA held.

The Company is in the process of exploring its mineral properties and evaluating other mineral properties in South America. The Company presently has no proven or probable reserves and on the basis of information to date, it has not yet determined whether these properties contain economically recoverable ore reserves. The Company has not generated any revenues from its operations to date and consequently is considered to be in the exploration stage. The amounts shown as mineral properties and deferred costs represent expenditures incurred to date, less amounts amortized and/or written off, and do not necessarily represent present or future values. The underlying value of the mineral properties and deferred costs are entirely dependent on the existence of economically recoverable reserves, securing and maintaining title and beneficial interest in the properties, the ability of the Company to obtain the necessary financing to complete development, and future profitable production.

2. SIGNIFICANT ACCOUNTING POLICIES

The interim consolidated financial statements of the Company have been prepared by management in accordance with Canadian generally accepted accounting principles. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Actual results could differ from those estimates. The consolidated financial statements have, in management's opinion, been properly prepared using careful judgment within reasonable limits of materiality. These interim consolidated financial statements should be read in conjunction with the most recent annual consolidated financial statements. The significant accounting policies follow that of the most recently reported annual consolidated financial statements.

New accounting policies

Effective January 1, 2008, new accounting standards were issued by the CICA which may impact the Company in the future as follows:

General Standards on Financial Statement Presentation

CICA Handbook Section 1400, General Standards on Financial Statement Presentation, has been amended to include requirements to assess and disclose a company's ability to continue as a going concern. The changes are effective for interim and annual financial statements beginning January 1, 2008. The adoption of this standard did not have an effect on the Company for the three months ended March 31, 2008

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Capital Disclosures

CICA Handbook Section 1535, Capital Disclosures, establishes standards for disclosing information about the company's capital and how it is managed. Under this standard the Company will be required to disclose the following, based on the information provided internally to the company's key management personnel:

- (i) qualitative information about its objectives, policies and processes for managing capital.
- (ii) summary quantitative data about what it manages as capital.
- (iii) whether during the period it complied with any externally imposed capital requirements to which it is subject.
- (iv) when the company has not complied with such externally imposed capital requirements, the consequences of such non-compliance.

This standard is effective for interim and annual financial statements beginning on January 1, 2008. The adoption of this change on the disclosure in the financial statements did not have an effect on the Company for the three months ended March 31, 2008.

Goodwill and Intangible Assets

CICA Handbook Section 3064, Goodwill and Intangible Assets, establishes revised standards for recognition, measurement, presentation and disclosure of goodwill and intangible assets. Concurrent with the introduction of this standard, the CICA withdrew EIC 27, Revenues and Expenses during the preoperating period. As a result of the withdrawal of EIC 27, companies will no longer be able to defer costs and revenues incurred prior to commercial production at new mine operations. The changes are effective for interim and annual financial statements beginning January 1, 2009. The Company has not yet determined the impact of the adoption of this change on the disclosure in its consolidated financial statements.

Financial Instruments Disclosures

In March 2007, the CICA issued section 3862 *Financial Instruments – Disclosures* and Section 3863 *Financial Instruments – Presentation*, which together comprise a complete set of disclosure and presentation requirements that revise and enhance current disclosure requirements. Section 3862 requires disclosure of additional detail by financial asset and liability categories. Section 3863 establishes standards for presentation of financial instruments and non-financial derivatives. The standard deals with the classification of financial instruments, from the perspective of the issuer, between liabilities and equity, the classification of related interest, dividends, losses and gains, and the circumstances in which financial assets and financial liabilities are offset. The adoption of this change on the disclosure in the financial statements did not have an effect on the Company for the three months ended March 31, 2008.

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

International Financial Reporting Standards ("IFRS")

In 2006, the Canadian Accounting Standards Board ("AcSB") published a new strategic plan that will significantly affect financial reporting requirements for Canadian companies. The AcSB strategic plan outlines the convergence of Canadian GAAP with IFRS over an expected five year transitional period. In February 2008 the AcSB announced that the date for publicly-listed companies to use IFRS, replacing Canadian GAAP, is for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2011. The transition date of January 1, 2011 will require the restatement for comparative purposes of amounts reported by the Company for the year ended December 31, 2010. While the Company has begun assessing the adoption of IFRS for 2011, the financial reporting impact of the transition to IFRS cannot be reasonably estimated at this time.

Comparative Figures

Certain of the prior period comparative figures have been reclassified to conform to the current period's presentation.

3. SHORT-TERM INVESTMENTS

As at March 31, 2008 and December 31, 2007, the Company held short-term investments comprised of the following:

	March 31, 2008	
	Maturity	Fair Value
		\$
12 month term deposit		
- 4.45% annual interest rate (\$3,600,000 principal)	August 13, 2008	3,704,410
	December 31, 2007	
	Maturity	Fair Value
		\$
12 month term deposit		
- 4.45% annual interest rate (\$5,000,000 principal)	August 13, 2008	5,091,243

All term deposits are fully redeemable in full or portion at the Company's option without penalty. Interest is paid on amounts redeemed subsequent to 30 days from the date of investment. The principal and interest are unconditionally guaranteed by the Bank of Montreal.

4. MARKETABLE SECURITIES

At March 31, 2008, the Company held 2,309,900 common shares of Amera Resources Corporation ("Amera") (2007 – 2,309,900) which had a quoted market value of \$392,683 (2007 - \$415,782). The Company has designated its marketable securities as available-for-sale financial assets and accordingly, changes in fair value are recorded in other comprehensive income in the period they occur (see Note 2). An unrealized loss of \$23,099 was recorded for the three months ended March 31, 2008. The Company holds these marketable securities as a result of entering into option and sale agreements for certain of its mineral property holdings in Argentina.

5. LONG-TERM INVESTMENT

	March 31, 2008	
	Principal \$	Fair Value \$
Asset backed commercial paper	207,102	186,392

The non-bank asset-backed commercial paper (ABCP) shown above is the estimated fair value of the Company's investment in Structured Investment Trust III, Series A Canadian Trust (the "Trust") with an original principal amount of \$207,102, originally maturing on September 13, 2007. When the Company acquired this investment it was rated R1 (High) by Dominion Bond Rating Service ("DBRS"), the highest credit rating issued for commercial paper and backed by R1 (High) rated assets and liquidity arrangements.

Since August of 2007, the market for ABCP has experienced significant liquidity problems. The demand for such paper has disappeared following the turmoil in credit markets and concerns regarding the quality and nature of underlying assets. The Trust has failed to redeem the ABCP at maturity and, along with 16 other ABCP conduits, is subject to restructuring under the Pan Canadian Investors Committee for the Third Party Asset Backed Commercial Paper (the "Pan Canadian Investors Committee").

On December 23, 2007, the Pan Canadian Investors Committee announced an agreement in principle to restructure the ABCP issued by 20 trusts, including the Trust. Under the proposal, holders of ABCP will exchange their paper for floating rate notes that have maturities based on the maturities of the assets underlying the ABCP. The notes are to be designed so that all available cash flow in the trusts will be paid to note holders.

The fair value of the Company's investment in the Trust was determined based on the management's judgment using available information and expectation of the assumptions market participants would use in pricing such ABCP as at the balance sheet date. The Company reviewed information including that provided by the Pan Canadian Investors Committee. In estimating fair value, the Company used a valuation approach based on the high likelihood of successful restructuring of the investment. It is estimated that the \$207,102 of ABCP which the Company has invested is represented by assets that will, on restructuring, be replaced by senior long-term floating rate notes. These senior notes are expected to obtain a AA credit rating.

In 2007 the Company assessed fair value and recorded an impairment loss of \$20,710 related to this investment, representing a 10% valuation allowance of the original principal amount. The Company does not believe that any further write-down is required at March 31, 2008.

It is possible that further information will become available on the actual composition of the referenced assets. A change in the estimate of the composition of the referenced assets would effect the valuation.

On April 9, 2008 Canaccord Capital Corporation ("Canaccord") announced the Canaccord Relief Program, a repurchase plan that offers the Company the opportunity to sell the ABCP at par. This program is dependent on the successful restructuring of the ABCP market as has been proposed by the Pan-Canadian Investor Committee. Due to the uncertainties that the restructuring faces the Company has decided to continue to value this investment at 90% of the principal amount until the restructuring is complete.

The Company has sufficient liquidity in its cash and short-term investments that it is not dependent on realizing on its investment in the Trust in the near future. The investment has been classified as long-term, pending resolution of the Trust liquidity issue.

(a) Argentinean Properties

The Company has either staked, fully paid or holds options to acquire 100% working interests in mineral properties in several provinces of Argentina.

(b) Valle de Cura Properties

As of March 31, 2008, the Company must make further payments with respect to option agreements on properties totalling US \$120,000. Payment has been postponed until the Company can obtain the necessary exploration permits

The Company has also agreed to pay net smelter return royalties ("NSR") of up to US \$7,000,000 once commercial production is achieved on the Valle de Cura properties. The US\$7,000,000 was calculated based on the following:

3 Properties - up to US \$1,000,000 in NSR each
5 Properties - up to US \$800,000 in NSR each

(c) Poncha Property

Effective March 30, 2007, the Company entered into an option agreement with Teck Cominco Limited through its subsidiary Teck Cominco Argentina Ltd. ("Teck Cominco") to earn an undivided 100% interest in Teck Cominco's 100% option for the 3,000 ha Poncha gold-copper project located in San Juan Province, Argentina.

6. MINERAL PROPERTIES AND DEFERRED COSTS (continued)

The agreement requires the Company to undertake work expenditures on the property totaling US\$3,200,000 and make payments totaling US\$2,880,000 to the underlying property owner over three years as follows:

Exploration Expenditures US \$	Option Payments US \$	Date
650,000	-	April 1, 2008
-	125,000	May 10, 2008
1,000,000	-	April 1, 2009

1,550,000	-	April 1, 2010
-	750,000	May 10, 2010
-	1,755,000	May 10, 2011
<u>3,200,000</u>	<u>2,880,000</u>	

The underlying owner will retain a 1% NSR royalty in the property. Teck Cominco has an option to re-earn up to a 65% interest in the Poncha Property through a “Back-In” right and an “Additional Earn-In” right. In order to exercise its initial Back-In right to acquire a 55% interest, Teck Cominco is required to fund expenditures equal to twice the Company’s expenditures (to a maximum of US\$6,400,000). To increase its interest to 65% Teck Cominco would need to spend a further US\$10,000,000. The Agreement provides that under certain conditions Teck Cominco may contribute to a percentage of the payments to the underlying property owner. Also, Teck Cominco reserves a 1% NSR royalty if it chooses not to exercise its back-in right.

(d) Mogote Property, Argentina

The Company has agreements with Amera, a publicly traded company with common management and directors, whereby the Company optioned its Mogote Property in the NW San Juan Region of Argentina. Amera has exercised the option to earn a 51% interest in the Mogote Property. Amera has fulfilled the option requirements to issue a total of 1,650,000 of its common shares to the Company and to incur US \$1.25 million of expenditures.

On May 14, 2007, Amera gave notice to the Company that it will not incur the additional expenditures required in order to earn the additional 24% interest.

The carrying value for the Mogote mineral property is nil.

(e) Rio Tabaconas, Peru

The Company holds an option to acquire a 100% interest in three concessions, in the Cajamarca Department of San Ignacio Province in northern Peru. Under the terms of the option agreement, the Company has paid US \$185,000 and is required to make further payments of US\$1,315,000 for a total of US\$1,500,000. On June 28, 2002, the Company suspended further exploration activities at the Rio Tabaconas project. This decision was made in response to the local community expressing its concerns with mineral exploration activities. The Company has deferred any further exploration until an agreement with the local community has been finalized. As a result the Company declared force majeure, as allowed under its option agreement. Accordingly, the Company and the optionor have deferred payment of the remaining option payments until the force majeure is discontinued. On August 1, 2003, the Company commenced paying US\$1,500 per month to the optionor as compensation during this waiting period. In 2006, the Company renegotiated the option agreement on Rio Tabaconas project and starting July 2006 commenced paying US\$3,000 per month to the optionor. The force majeure is still in effect as at March 31, 2008.

(f) Golden Amara Resources Inc. Joint Venture

On June 30, 2007 the Company entered into a 50/50 joint venture with Amara to evaluate and acquire precious and base metal properties in Colombia. The joint venture has hired an operations manager and retained contract exploration personnel. In addition, the joint venture is in the process of evaluating a number of opportunities but has not acquired any mineral properties to date, accordingly the Company's proportionate share of costs incurred have been recorded as general exploration expense.

On May 7, 2008, the Amara gave notice that it was withdrawing from the Golden Amara Inc. Joint Venture Agreement and would not contribute further funds.

The Company has signed and will continue to sign joint venture agreements for certain of its properties with other junior exploration companies. The Company normally receives shares in these companies as compensation along with their commitments for exploration expenditures.

The weighted average fair value of the stock options granted during the year, calculated using the Black-Scholes Option Pricing Model, was \$0.26 (March 31, 2007 - \$Nil) per share. Option-pricing models require the use of estimates and assumptions including the expected volatility. Changes in the underlying assumptions can materially affect the fair value estimates and, therefore, existing models do not necessarily provide reliable measure of the fair value of the Company's stock options.
